

# Missouri Health Information Exchange Regional Listening Sessions

Group Discussion Notes from Cape Girardeau – August 14, 2009

1. Briefly describe a future vision for a Missouri Health Information Exchange (HIE). What goals should be accomplished as Missouri develops a strategic roadmap for Health Information Technology (HIT) and Health Information Exchange (HIE) in the state?

- |  |   |
|--|---|
| <ul style="list-style-type: none"> <li>• Information needs to be accessed on a universal platform. (must be compatible with all HER programs)</li> <li>• Ability to share information benefitting everyone (includes patient and providers).</li> <li>• What is the intent, benefit, incentive?</li> <li>• Get the interest of the public, stakeholders, and providers &amp; explain importance.</li> <li>• Ex-possibly something in the form of a driver license that can be updated but controlled by patient. Will be easily accessed by medical providers in case of an accident.</li> <li>• Improve patient safety – allow patients/providers to make informed decisions based on a complete view of patient's history.</li> <li>• To improve the efficiency of care – ex- duplicating tests.</li> <li>• Reduce costs</li> <li>• Continuity of care</li> <li>• Must be able to ensure secure delivery of accurate health information in a timely manner to authorized users across the state. Accessible 24/7.</li> <li>• Future Vision:</li> <li>• <u>Interoperability</u>, region-to-region, state to state.</li> <li>• <u>Data Repository</u>, secure/protected</li> <li>• <u>Affordability for everyone</u> upfront funding &amp; incentives for ongoing expenses</li> <li>• <u>Outcome Data</u> Reported</li> <li>• Goal:</li> <li>• Better, region to region, state to state.</li> <li>• Quicker treatment – safer &amp; more efficient (by duplication of services)</li> <li>• Who determines who has access to the network/exchange?</li> <li>• Mechanism to connect to disparate HER systems already owned so no re-investments are needed.</li> <li>• Vision: “An affordable, sustainable, secure, repository of patient driven health information.”</li> <li>• Exchange of information outside of Missouri.</li> <li>• Information is accurate with immediate access to authorized individuals.</li> <li>• Provides a basis for quality improvement and patient safety.</li> <li>• Reduces redundancy.</li> <li>• Provide more consistent data.</li> <li>• What participation with payers have?</li> </ul> | <ul style="list-style-type: none"> <li>• Vision:</li> <li>• Complete access for Missouri; including public health</li> <li>• Goal:</li> <li>• Healthcare – not based upon your ability to pay. (Total, dental, physical &amp; behavioral)</li> <li>• Complete security of records</li> <li>• Number 1 goal – How will each specific system be able to centralize with all other agencies. (CONCERN)</li> <li>• Capability to inter-face.</li> <li>• Comment – Need to be able to get access or share info from other states as well. Providers on state lines will bet patients from other states.</li> <li>• Goal:</li> <li>• Use outside agency to create &amp; maintain the system.</li> <li>• Get all providers on the same level playing field, ex. Home health, mental health, hospitals, etc.</li> <li>• Need to be able to get data connectivity – via cell signals to rural areas. Need coverage.</li> <li>• Strict timetable for making decisions.</li> </ul> |
|--|---|

## 2. What roles are critical for a statewide Health Information Exchange (HIE)?

- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• Educator – facilitator – technical assistance</li><li>• Good marketing is critical</li><li>• State’s system must have universal compatibility</li><li>• Must have a statewide policy and standards set up.</li><li>• Who determines what parties are privileged to the HIE?<ul style="list-style-type: none"><li>- Need a standardized form that is universal to all providers &amp; patients in the HIE.</li><li>- How is the governmental funds allocated fairly?</li></ul></li><li>• Education/Training</li><li>• Facilitation</li><li>• Universal compatibility</li><li>• Fair distribution of governmental funding? Laborious application &amp; waiting time for money.</li><li>• Will there be a regional, state, national team of IT personnel to help with full integration across procedures &amp; training of staff at each facility?</li><li>• Governance or oversight form state</li><li>• Data base administration</li><li>• Aggregated data</li><li>• Stores data securely</li><li>• Tracks access</li><li>• Hardware ownership</li><li>• Secures hardware/software required</li><li>• Will financing be a part of?</li><li>• Education</li><li>• Network administration</li><li>• Privacy issue – security</li><li>• TA – Technical Assistance – readily available</li><li>• Technical linkage – to other systems</li><li>• Finance- monies - sustainability</li><li>• How user-friendly system will be</li><li>• Regional coordinator</li><li>• Ethnically diverse – culturally competent</li><li>• Educator for provider and patient</li><li>• State-wide policy</li><li>• Get state on board &amp; up to date with providers, update systems &amp; technology. State is behind providers in IT field.</li><li>• Who will the providers report to on the state level?</li><li>• Who will head up all of the various departments at the state level, ex. Department of Mental Health, Home Health, and Health &amp; Senior Services?</li><li>• Will IT people of a good quality be able to be afforded with this project?</li><li>• Need extra layers of responsibility on those who is appropriately access or attempt to access private records.</li></ul> |  |
|--|--|

### 3. What are you most concerned about related to Health Information Exchange (HIE)?

- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• Privacy/security of information/identity theft</li><li>• Medical information used for marketing</li><li>• System must be user friendly</li><li>• Is information going to be used to penalize organizations in any way?</li><li>• The reward and benefit must be considerable for organizations who may have to possibly hire additional staff.</li><li>• Must not be too labor intensive-organizations are already bogged down with paperwork.</li><li>• Privacy/Security</li><li>• Affordability – upkeep, ongoing expense – interfacing</li><li>• Who pays for it? Equitable funding? Support?</li><li>• Collaborative effort<ul style="list-style-type: none"><li>- How to ensure everyone in the region/state is connected in the HIE?</li><li>- Is a cut in reimbursement enough to affect the cost?</li></ul></li><li>• In the current economic environment, hospitals &amp; other providers are struggling to break-even on provider care, how are these providers (rural areas with high uninsured/underinsured patients) going to pay for this?</li><li>• Security</li><li>• Maintainability/sustainability</li><li>• Affordable</li><li>• Value added – what is ROI?</li><li>• Accessibility</li><li>• Consumer acceptance</li><li>• Provider acceptance</li><li>• Generational issues – participation?</li><li>• Take away from patient care.</li><li>• Sustainability &amp; financing.</li><li>• Security &amp; privacy.</li><li>• What happens if system crashes – system maintenance.</li><li>• Perception &amp; interaction – willing to share.</li><li>• Should patients be allowed to limit access?</li><li>• HIPPA regulations</li><li>• Timeframe to implement program</li><li>• Cost of system</li><li>• Definition of sharable information</li><li>• Recommendation – determine what data will be shared?</li><li>• Sustainability – how will it be paid for?</li><li>• Need real, achievable time lines.</li><li>• Privacy across the field. Don't want a nosy staff member at a doctor's office to have access to private info.</li></ul> |  |
|--|--|

4. What general comments do you have related to Health Information Exchange (HIE)? What other questions do you have?

- What is the benefit to the cost and effort required? What is the intent?
- Must have consumer buy-in.
- How is general public to be convinced of the importance of HIE? How will information be protected?
- Fantastic conceptual idea!
- Implementation, funding & Governmental leadership are the key.
  - Committee needed to oversee project – get everyone involved
- Incentives for doctors not to re-do tests.
  - Fee for service industry
  - Liability and trust among other providers/tests.
- Public accountability/transparency
- Communication of state level progress and updates for HIE
- Will grants be available for other HIE initiatives besides at the state level?
- Where will information be stored?
- Who will participate and what will be their resistance? i.e. schools, pharmacies, public health agencies, nursing homes, and payers.
- Will participation be mandatory for certain entities?
- How many years will implementation be spread over and what are the tasks involved for each?
- Will rural areas be well presented rather than only St. Louis and Kansas City?
- In actuality – system would be great.
- Might be an extremely complicated process.
- How receptive is public going to be?
- Concerns of patients about how their information is being accessed/used?
- What will they do to the providers and their current system?
- Will providers be able to continue with their current systems?
- What will we do with paper records?
- What is to say that this system will be better than what we already have?
